Professional Experience

Care/of - Senior Software Engineer

Oct 2020 - Jul 2024

Developed new features and maintained systems supporting customer retention at a direct-to-consumer health supplement delivery startup.

Mainly worked on a Ruby on Rails based back end servicing a mobile app and web front end. Contributed to infrastructure configuration and front end codebases using React, NextJS, Styled Components and React Native.

Spearheaded design and planning of major greenfield projects and championed maintenance and tech debt removal. Proactively identified pain points and proposed solutions.

Promoted to Senior level in Fall 2021. Proud (but not excessively proud apparently) three time recipient of the '#behumble' core value award.

Fabric Technologies - Senior Software Engineer

Jan 2019 - Oct 2020

Created customer-facing and back office software on a small, deadline-driven team within a life insurance startup.

Used cutting-edge tools such as Gatsby, React, Redux, TypeScript, Node, CSS-in-JS, and a variety of AWS services for serverless full-stack development.

Google - Software Engineering Contractor

Aug 2017 - Dec 2018

Delivered Python and JavaScript code for the Local Guides web application, a UGC product supporting millions of users globally.

Worked on an internal tool for automatically generating natural language for describing places within Maps automatically based on metadata.

Study Abroad Apartments Inc. - Lead Engineer

Jul 2016 - Aug 2017

Lead of all aspects of full-stack development and design for a small startup providing international accommodation for students.

Made high-level decisions on product direction as lead (sole) developer. Later hired, trained, and managed a junior developer. Instituted agile practices and continuous integration to streamline and organize our progress.

General Assembly - Instructor

Jul 2015 - Present

Developed curriculum and taught night classes on full-stack web development for students with various programming backgrounds. Held weekly mentoring sessions teaching graduates more advanced topics and helped with personal projects.

2U Inc. - Web Developer, Implementations

Jun 2014 - Jul 2016

Built and deployed application systems, marketing sites, and learned management systems for major U.S. universities' online graduate degree offerings. Worked with mature code bases using a variety of languages and frameworks.

Freelance Journalist/Translator

Nov 2008 - Feb 2014

Helped start a company in Yokohama, Japan, where I did reporting, writing, translation, photography and editing for a few arts and culture magazines.

My work has also appeared in Quartz, Business Insider, City Limits, Skift, WNYC and other outlets. Translated Japanese news for Nippon TV.

Technical Skills

JavaScript

Education

General Assembly Web Development Immersive

Feb 2014 - May 2014

Underwent 12-week intensive full-stack web development bootcamp.

Learned basics of software engineering with a focus on Ruby on Rails and relational databases.

CUNY Graduate School of Journalism

Aug 2010 - Dec 2011

MS in digital journalism, specializing in business and economic reporting.

Built an interactive capstone project to explain and investigate the business of migrant workers' international remittances with interviews, video, and data visualization elements.

Rutgers University

Aug 2002 - May 2006

BA in English
